SUMMARY

Creative Front-End Developer & Visionary Web Designer

A dynamic front-end developer with a passion for creating responsive, visually appealing web applications. Specializing in JavaScript, React . My expertise spans building responsive interfaces, optimizing web performance, and ensuring seamless user experiences. With a strategic approach to design and development, I excel at creating innovative web solutions that constantly push my boundaries. My commitment to continuous learning and improvement enables me to deliver creative, efficient solutions that consistently exceed expectations.

EXPERIENCE

Front End Developer ,   Mar 2024 — Current

- Developed and worked on multiple personal web development projects, applying **HTML5**, **CSS3**, and **JavaScript** to build responsive and interactive web pages.
- Collaborated with a friend on a web application, using **React.js** and **Tailwind CSS** for creating dynamic designs.
- Utilized **Git** for version control and **Figma** for UI/UX design, ensuring effective collaboration.
- I've completed the Academy of Digital Courses.
- Always learning through self-study, my goal is to work on real projects where I'll bring my skills, dedication, and enthusiasm.
